Comments about **Tea & Symphony (The English Baroque Sound 1967-1974) - Various**

Kale

Excellent compilation with absolutely no filler amongst its 24 tracks. It seemed to be available for a few days only then disappeared from the shops. Not sure why.

Dead Samurai

I loved this CD when I first got it, but playing it again nearly 10 years later, for me it peaks with the first 5 tracks, then doesn't really offer up anything too exciting for its remainder. Still worth keeping hold of for an occasional late evening spin, though. Re: the brevity of its availability- Castle Music closed down in 2007- rather suddenly by the looks of things, as several other just-out gems also vanished overnight, like the Peep Show compilation and the "Real Life Permanent Dreams" box set, to name but two.
